I am an academic researcher and teacher. Currently I am a researcher at TU Delft in the Netherlands. I collaborate with the Quantum Delta NL project on Quantum Technologies. My research focuses on philosophy of technology and AI, technology assessment, AI ethics, and ethics of quantum technologies. My main professional skills are analysis and research, speech and writing, communication, teaching, and project management. I bring international mindset, creativity, curiosity, and resiliency. I use mixed qualitative methods grounded in philosophy, history, media studies, and science and technology studies. I have secondary expertise in data visualization, digital game studies, and journalism.

Research fields: ethics of quantum technologies, AI ethics, philosophy of technology, artificial intelligence, software studies, hermeneutics, and continental philosophy

Teaching fields: continental philosophy, ethics, political philosophy, history of science and technology, metaphysics, German and French contemporary philosophy

Fundraising skills: applications and projects for FCT (Portugal), ANR (France), CNRS (France), FNRS (Belgium)
